How To Make Real Cash Playing Solitaire: Tips, Guide & Best Picks in 2026

If you enjoy solitaire and are wondering whether it is possible to turn your gameplay into real money, there are several cash-based apps worth knowing about. Platforms such as Solitaire Cash allow players to enter tournaments and compete for real prizes.

However, it is important to keep expectations realistic. Playing solitaire for cash can provide occasional extra money, but it should not be treated as a dependable source of income. For beginners, free-entry tournaments are a sensible place to start before putting any money into paid competitions.

Real money solitaire games generally work through skill-based tournaments. Players pay an entry fee, compete against other participants, and the winners receive part of the available prize pool after applicable fees.

If you want to make money playing solitaire, this guide explains how the main apps work, what you may be able to earn, potential risks, and where cash tournaments may be restricted.

Is It Realistic to Make Money Playing Solitaire?

Yes, you can make money playing solitaire, but the amount varies considerably from one player to another. Casual players should generally expect small and inconsistent returns, while highly skilled players may earn more by performing well in competitive tournaments.

In real money solitaire games, your winnings depend on factors such as tournament entry fees, your skill level, competition, and the platform's fees.

What You Can Actually Expect to Earn

Apps such as Solitaire Cash offer tournaments with entry fees ranging from very small amounts to several dollars. Some tournaments have reported prizes reaching as much as $139.

Independent reviews of similar gaming apps have suggested that regular players may earn roughly $90 to $150 per month under certain circumstances. However, these figures should not be considered guaranteed income. As your skill improves, skill-based matchmaking can also place you against stronger competitors.

Before deciding to play solitaire for cash, check more than just the app-store rating. User reviews on independent platforms can reveal complaints or issues that may not be obvious from an app's rating alone.

The Bigger Risks Worth Knowing

Real-money solitaire tournaments generally require players to be at least 18 years old. Availability can also depend on where you live, because some US states restrict or prohibit cash-based gaming.

Withdrawal policies are another important consideration. Some platforms publish relatively long maximum processing periods even though many users report receiving payments sooner. Bonus Cash may also have different rules from withdrawable cash, so always read the current terms before entering a tournament.

6 Real Ways to Make Money Playing Solitaire

Below are six ways players can potentially earn money through solitaire, ranging from standard cash tournaments to free-entry competitions and larger competitive events.

1. Solitaire Cash

If you want to play solitaire for cash, Solitaire Cash is one of the better-known options in this category. The app allows players to compete in cash tournaments, with payouts available through methods such as PayPal.

Entry fees can start at just a few cents and increase to several dollars depending on the tournament. The platform takes its applicable share, while qualifying winners receive the remaining prize money.

Papaya Gaming, the company behind Solitaire Cash, has reported individual tournament prizes of up to $139. The app also has a $5 minimum withdrawal, although processing times and applicable fees should be checked before withdrawing.

To get started:

- Download Solitaire Cash and complete the required age verification.
- Check whether real-money tournaments are available in your state.
- Begin with a freeroll or low-cost tournament before entering higher-stakes competitions.

Winning is never guaranteed. Players who perform well can eventually encounter tougher opponents through skill-based matchmaking.

2. Solitaire Clash

Solitaire Clash, developed by Avia Games, offers another way to make money playing solitaire through skill-based competitions.

The basic concept is similar to other real money solitaire games. Players enter a tournament, compete against another participant, and the winner receives a share of the available prize after the applicable fees.

Some independent reviews have estimated potential earnings of around $90 to $150 per month for regular players, although actual results can vary significantly. As with other competitive apps, stronger matchmaking can make it more difficult to maintain the same level of winnings over time.

Cash tournaments may also be unavailable in certain US states, so check your eligibility before making a deposit.

3. Solitaire Cube

Solitaire Cube is another option for players looking to play solitaire for cash. It uses a head-to-head, skill-based tournament format in which players compete for real prizes.

Depending on the tournament and location, payouts may be available through PayPal or Cash App.

Real-money tournaments are restricted in several US states, including Arkansas, Connecticut, Delaware, Indiana, Louisiana, Maine, and South Dakota. Availability can change, so players should confirm the current eligibility requirements before entering.

The earning potential is broadly similar to other skill-based solitaire tournament apps rather than being a guaranteed way to generate significant income.

4. Solitaire Cash Freeroll Tournaments

You do not necessarily have to spend your own money to start playing solitaire for cash. Solitaire Cash freerolls allow eligible players to participate without paying an entry fee.

Instead of risking a deposit, players compete for smaller prize pools. This makes freerolls useful for learning the game's scoring system and understanding how tournament competition works.

The minimum withdrawal for Solitaire Cash is $5, but freeroll rewards may initially be credited as Bonus Cash and can be subject to additional requirements. Always check the specific tournament rules before assuming that a prize can immediately be withdrawn.

For beginners, freerolls can be a practical way to gain experience before trying paid tournaments.

5. Solitaire Cash Gems Tournaments

Another option within Solitaire Cash is Gems tournaments. Instead of paying an entry fee directly with your own money, eligible tournaments can be entered using Gems earned through gameplay.

This provides another opportunity to compete without making a direct cash deposit. Gems can be earned through regular activity and completed matches, depending on the current rules of the app.

The prize structure can vary between tournaments, so check the individual event details before entering. Gems tournaments are better viewed as a low-risk way to practice competitive solitaire while still having the possibility of receiving a real reward.

6. Solitaire Cash World Solitaire Championship

Competitive solitaire can also reach a much larger scale through live championship events.

Papaya's 2026 World Solitaire Championship demonstrated the potential size of major solitaire competitions, with a reported total prize pool of $300,000 and $150,000 going to the winner.

The inaugural event brought approximately 400 finalists to Miami in February 2026 after qualification through Solitaire Cash. Competitors were ranked through skill-based scoring and elimination rounds.

The 2026 championship has already ended, so those particular prizes are no longer available. Nevertheless, the event illustrates how far competitive solitaire can extend beyond ordinary mobile tournaments.

Comparing the Ways to Make Money Playing Solitaire

Different solitaire earning methods come with very different levels of cost, competition, and potential rewards.

Method	Entry Cost	Typical/Reported Payout	Type of Play
Solitaire Cash	$0.01 to $5+ per match	Up to $139 per tournament	Real-money competition
Solitaire Clash	$1 to $5 per match	Around $90 to $150 monthly in some reports	Real-money competition
Solitaire Cube	Small per-match entry	Similar category to Solitaire Clash	Real-money competition
Freeroll Tournaments	Free	Smaller guaranteed prizes	No-deposit pla
Gems Tournaments	Free, using earned Gems	Modest cash prizes	No direct cash deposit
World Solitaire Championship	Free qualification	Large championship prize pool	Highly compet

Where Else You Can Earn Playing Games

Solitaire is not the only type of mobile game that can be connected to reward platforms. Services such as Snakzy, Swagbucks, and Freecash provide other ways to earn rewards through games, surveys, shopping activities, and offers.

These platforms are not dedicated solitaire applications, so they should be considered an additional earning option rather than a replacement for real-money solitaire tournaments.

App	Best For	Entry Cost
Snakzy	Earning extra money from mobile games	Free
Swagbucks	Surveys, shopping, games, and offers	Free
Freecash	Games, offers, surveys, and other tasks	Free

If your goal is to earn additional rewards while playing mobile games, combining a reward platform with solitaire can give you more options than relying on one game alone.

What Doesn't Work

The biggest mistake when trying to make money playing solitaire is treating it like guaranteed employment. Even skilled players can experience losing streaks, tougher competition, fees, and withdrawal limitations.

Here are some common mistakes to avoid:

- **Jumping into expensive tournaments immediately.** Start with free or low-entry competitions and learn how the system works before risking larger amounts.
- **Ignoring location restrictions.** Cash tournaments are not available everywhere. Entering a restricted tournament can create problems with your account or withdrawal.
- **Expecting instant withdrawals.** Processing times can vary, and published terms may allow considerably longer windows than typical user experiences.
- **Relying only on app-store ratings.** Check independent reviews as well, particularly when researching complaints about withdrawals or customer support.

These issues do not automatically mean that a solitaire cash app is illegitimate. They simply show why it is important to understand the rules, fees, eligibility requirements, and withdrawal conditions before depositing money.

Final Thoughts on Make Money Playing Solitaire

It is possible to make money playing solitaire, but the realistic opportunity is generally limited to extra cash rather than dependable income.

If you are new to real money solitaire games, starting with freerolls or Gems tournaments can let you learn the competitive format without immediately putting your own money at risk. Once you understand the scoring and tournament structure, you can decide whether paid competitions are appropriate for you.

You can also explore reward platforms such as Snakzy if you want to earn from other mobile games and activities alongside solitaire.

The most important rule is simple: never treat solitaire winnings as guaranteed income, and always review the current tournament, eligibility, fee, and withdrawal rules before playing for cash.

FAQs

Is Solitaire Cash a legit way to make money playing solitaire?

Solitaire Cash is a real-money solitaire platform operated by Papaya Gaming, and eligible winners can receive payouts through supported methods such as PayPal. The minimum withdrawal is $5, although consistent earnings are not guaranteed and the applicable rules should be reviewed before playing.

How much money can you realistically make playing solitaire?

For most casual players, earnings are likely to be relatively small and inconsistent. Entry fees, competition, skill level, and tournament results all affect your final winnings. Higher earnings generally require stronger solitaire skills and consistent tournament performance.

Do you have to pay money to start playing solitaire for cash?

No. Some Solitaire Cash options, including freerolls and Gems tournaments, can be entered without making a cash deposit. These competitions generally have smaller rewards than paid tournaments.

Which US states restrict real money solitaire apps?

Real-money solitaire availability varies by state. Restrictions have been reported in states including Arkansas, Delaware, Louisiana, Michigan, and South Dakota, among others. Because eligibility rules can change, check the app's current state list before entering a cash tournament.

What is the minimum withdrawal on solitaire cash apps?

Minimum withdrawal amounts depend on the platform. For Solitaire Cash, the stated minimum is $5. Processing fees and withdrawal times can apply, so review the current withdrawal terms before requesting a payout.

Can you make money playing solitaire without spending your own money?

Yes. Free-entry options such as freerolls and Gems tournaments can allow players to participate without making a cash deposit. However, the potential prizes are generally smaller than those offered in paid tournaments.
